***Response to Arguments***

1. In view of the appeal brief filed on December 8, 2003, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8 and 11-13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ota (EP 823,270).

Ota discloses a video dance game apparatus having a dance music signal including a beat signal data output from the game sound source (4). The game sound source (4) may include a reproducing device such as a CD player, a DVD player or the like to reproduce a music sound from an information record medium such as a CD, DVD, or the like. This beat signal data is

Art Unit: 3713

inputted to the CPU (1). The CPU detects a timing at an on-beat, on the bases of this beat signal data, and then compares this timing at the on-beat with a timing of a played performance to calculate a score (Page 2, line 49-Page 3, line 7, Page 10, lines 24-44, Page 14, lines 43-50, and Figures 1 and 2).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ota (EP 823,270) in view of Okamoto (U.S. 5,735,744).

Ota discloses to one having ordinary skill in the art that as discussed above regarding claims 1-8 and 11-13. Although Ota discloses obtaining music data from a CD for a music game apparatus, Ota seems to lack explicitly disclosing:

Regarding Claims 9 and 10:

- obtaining music data from a music data distribution server via a communications network for game music.

Okamoto, like Ota, discloses an interactive communication system for video games.

Therefore, Okamoto and Ota are analogous art. Furthermore, Okamoto teaches:

Regarding Claims 9 and 10:

Art Unit: 3713

- obtaining music data from a music data distribution server via a communications network for game music (Column 1, lines 49-53, Column 2, lines 8-17, Column 3, lines 54-63, and Figures 1 and 2).

It would have been obvious to one having ordinary skill in the art, at the time of the applicant's invention to modify Ota such that the game music would be obtained from a music data distribution server via a communications network as in Okamoto rather than a music CD. One would be motivated to obtain the game music from a music data distribution server via a communications network so that a player would not have to purchase and carry around a CD or other software each time they wanted to play a game making playing the game much more convenient to the player.
